Get connected to the future

ioDent® – Smart Dental Solutions

ioDent® – Welcome to the world of dental solutions

The Internet of Things (IoT) has now become reality in dental practices, with W&H offering intelligent and networked product solutions in dentistry under the new digital brand ioDent® – W&H Smart Dental Solutions. In the future, the cloud-based system will communicate with all your connected devices. Data exchange is secure and easy!

Access to your networked devices

Any time and from anywhere securely.

Improved efficiency and productivity of your team

The automation of administrative work through ioDent® allows you and your team to focus on your patients.

Efficient support in everyday practice

By sharing data, your service partner can provide better service.

For further details, have a look on Intelligent Assist on the last page.

Implantmed Plus with ioDent® system

Implantmed Plus offers a surgical device that includes the unique »ioDent® system«. The intelligent W&H solution will increase safety in the practice and resources can be planned in advance to increase efficiency.

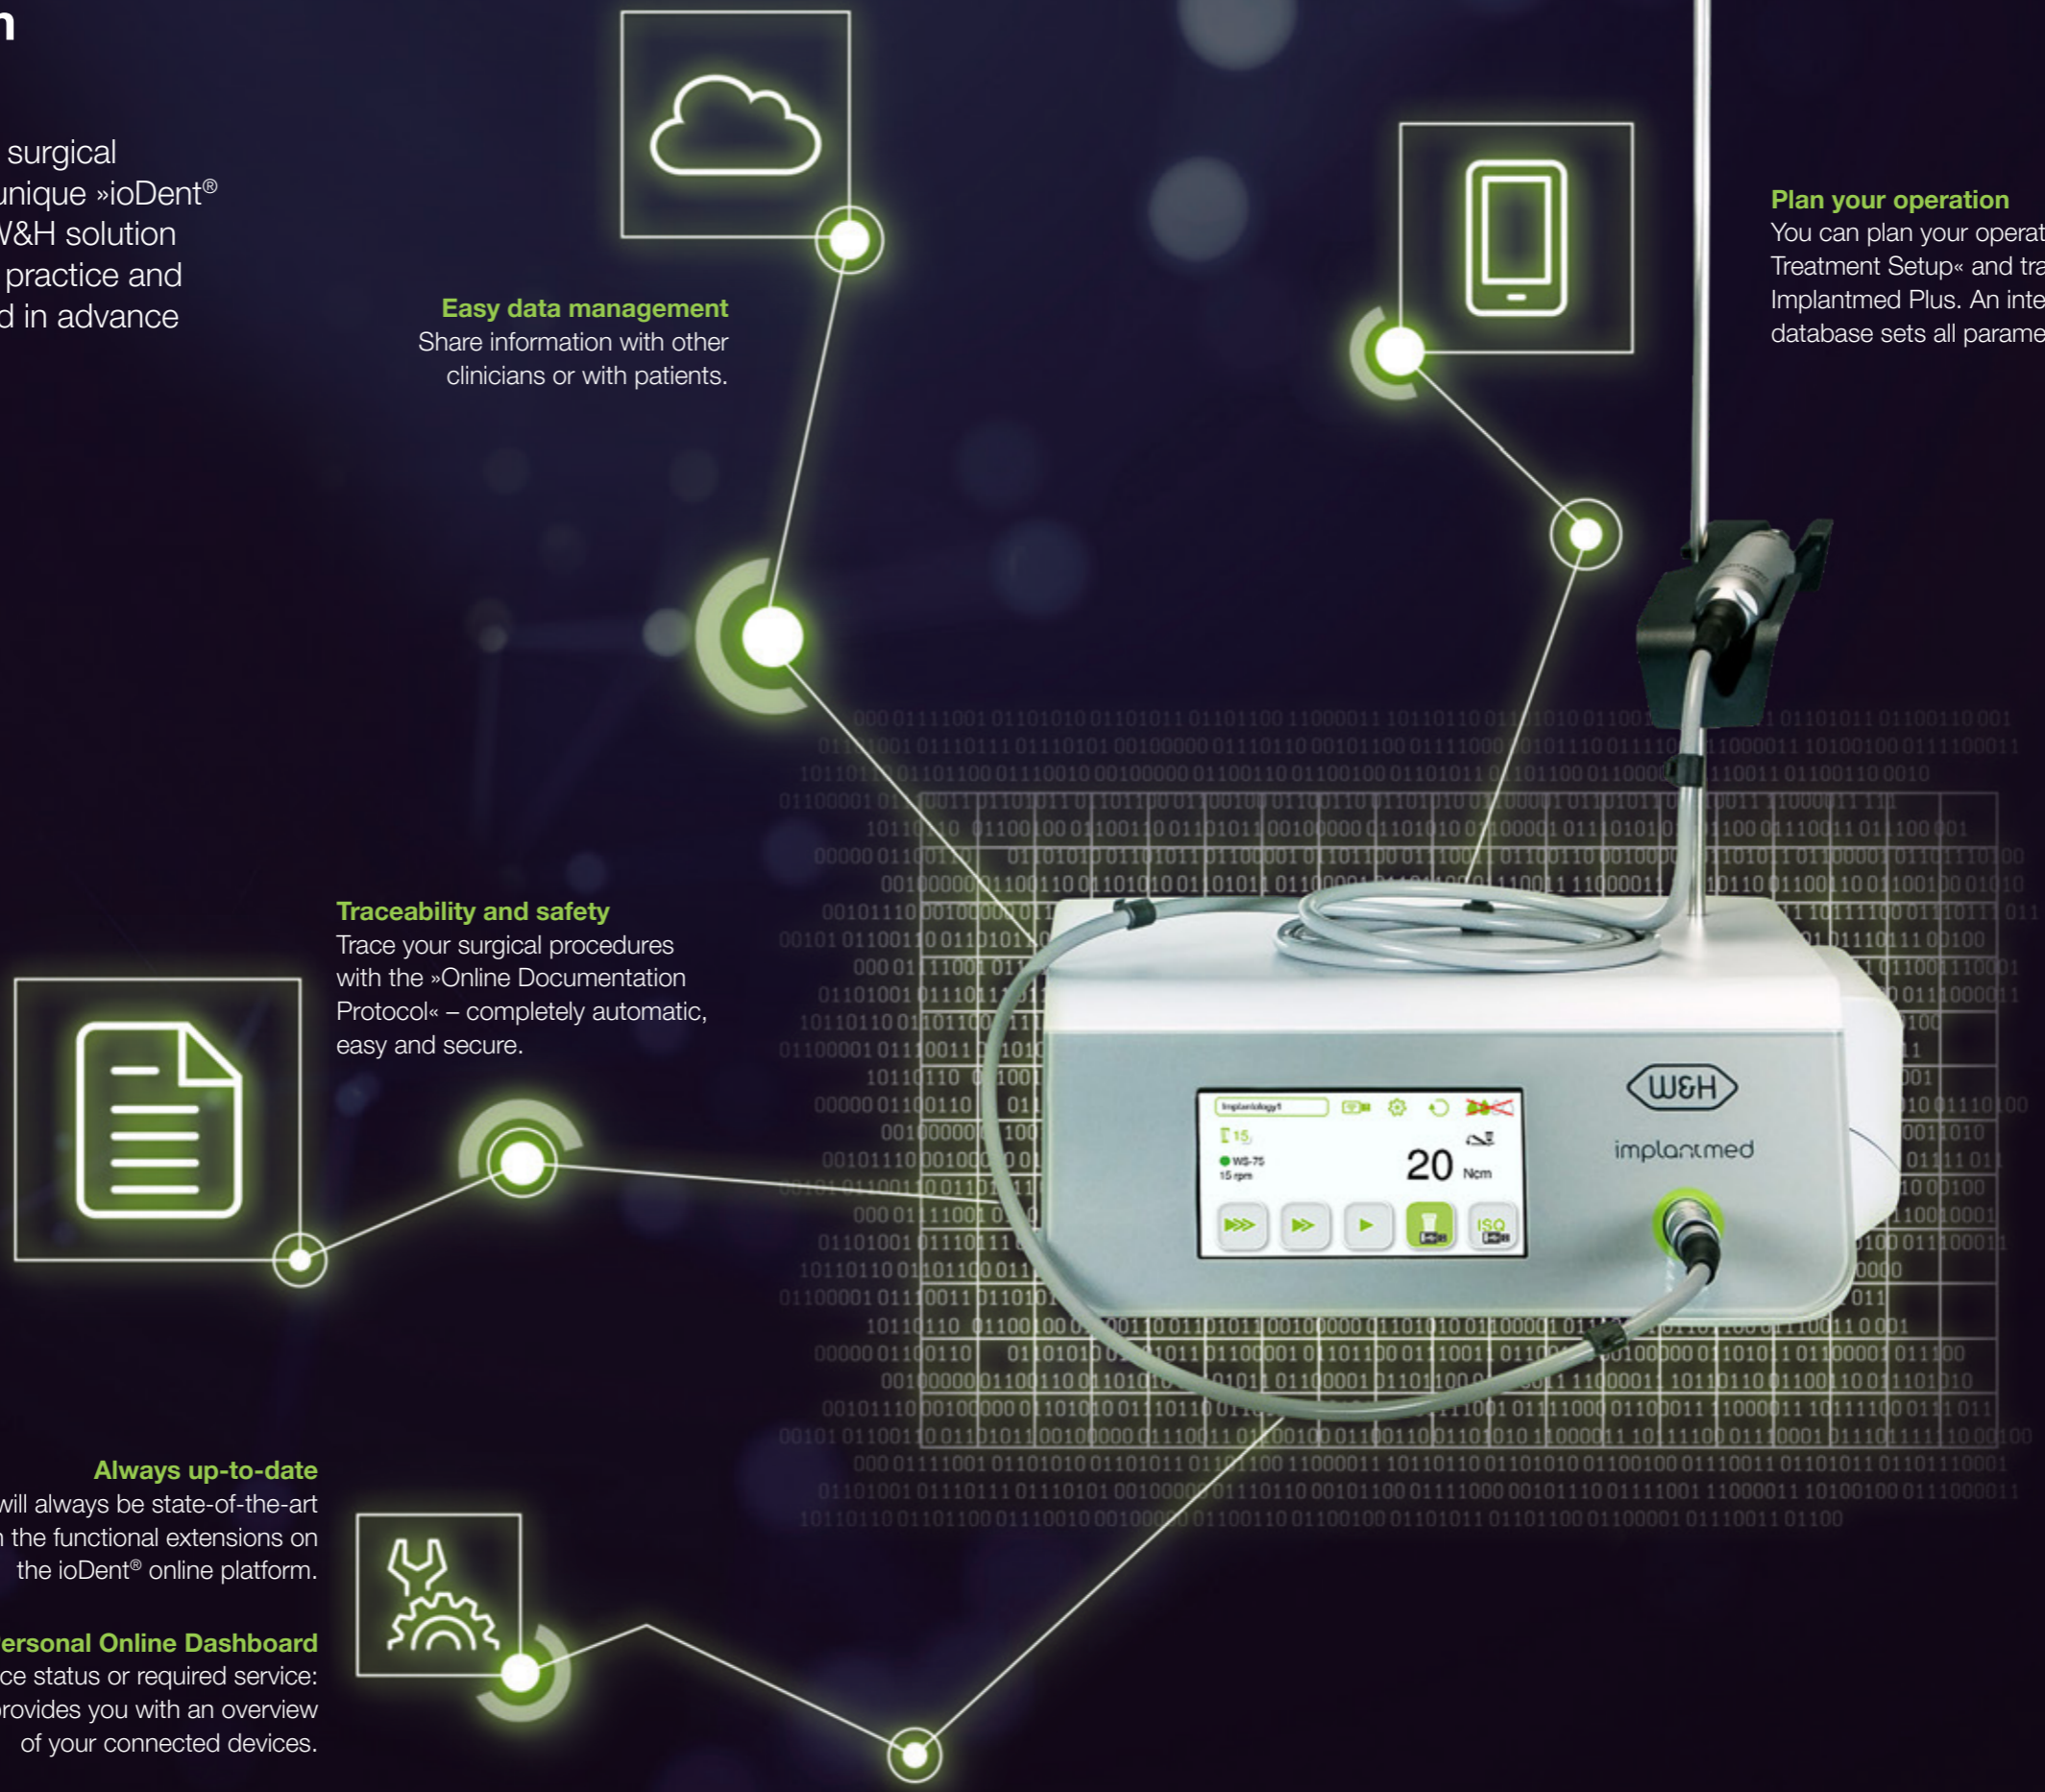

Easy data management
Share information with other clinicians or with patients.

Plan your operation
You can plan your operation in advance with the »Online Treatment Setup« and transmit the configuration to your Implantmed Plus. An integrated implant manufacturer database sets all parameters before the operation.

Traceability and safety
Trace your surgical procedures with the »Online Documentation Protocol« – completely automatic, easy and secure.

Always up-to-date
You will always be state-of-the-art with the functional extensions on the ioDent® online platform.

Personal Online Dashboard
Whether device status or required service: »Monitoring« provides you with an overview of your connected devices.

Innovative reprocessing with the ioDent® system

The new W&H sterilizers combined with the ioDent® system ensure intelligent and networked reprocessing of instruments. With a wide selection of smart solutions and options, digitalisation becomes a reality even for sterilization.

Improved efficiency, time saving

- › Reduced paper documentation
- › Fully automatic cycle documentation with cloud storage
- › Enhanced user experience with Intelligent Assist management system

Peace of mind

- › Streamlined administration for easy audit/compliance management
- › Enhanced staff and patient safety
- › No need to install local software
- › Installation via Wi-Fi or cable

Security

- › Fully automatic storage of cycle reports
- › All documents available from the online device record at the press of button

ioDent® Intelligent Assist

Are the devices working perfectly? Is a service due? Or is a device malfunctioning? The ioDent® intelligent Assist monitoring system enables proactive support with service and maintenance in line with all national guidance requirements.

Your advantages at a glance

Better service

Accurate real-time information on the sterilizer status enables W&H service partners to apply new ways of providing service. You benefit from shorter response times, well-prepared visits and automatic supply of consumables.

Increase uptime of your sterilizers

Ensure smooth running of one of the most vital processes in your practice. This is achieved through a combination of regular monitoring, perfect maintenance and early through of problems by your W&H service partner.

Improve efficiency and productivity of your team

The automation of administrative work through ioDent® allows you and your team to focus on your patients.
